Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. This Office Action is a response to the preliminary amendment filed July 24, 2003. The Applicant has canceled claims 1-9. Newly added claims 10-28 are pending in the application.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 10-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,611,903 well-known feature of which Official Notice is hereby taken.

- a. The patented claims 1-9, teach each and every claimed limitations in claims 10-28 of the instant application with an exception that claims 1-9 of the patent do not teach the instant claimed limitation of "wherein data received from at least one of the host computers is converted to a format compatible with transfer to the second storage subsystem, prior to copying thereof to the second storage subsystem", as recited in the instant claim 10, last phrase.

- b. Converting a source data format (e.g., count key data format) to another data format (e.g., fixed-length data block format) to make the data format compatible with the data format used by a destination device has been known and widely implemented in the pertinent art. The main purpose for doing so is to share the data between two or more computers platforms in that each platform uses a different data format from each other.

- c. It would have been obvious to one having ordinary skill in the art at the time the invention was made to include logic into the patented storage controller for converting the received data from at least one of the host computers to a format compatible with transfer to the second storage subsystem, prior to copying thereof to the second storage system so as to allow the different platforms, as recited in the patented claim 5, to share data therebetween.

Claim Objections

4. Claims 10, 18 and 22 are objected to because of the following informalities:
 - a. As per claim 10: in the last three lines, should "converted to a format compatible with transfer to the second storage subsystem" be replaced with —converted to a format compatible with a format that is used in transferring data to the second storage subsystem— for clarity? See also claim 18, the last three lines; and claim 22, lines 8-10.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
